DATE MAILED: 02/23/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/829,358

Applicant(s)

WONG ET AL.

Examiner

Tien Dinh

Art Unit

3644

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 December 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) 16-20 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Election/Restrictions

Applicant's election of group I in the reply filed on 12/13/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 16-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/13/04.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Fischell.

Fischell discloses a spacecraft having a bus that carries instruments that generate heat. Fischell also discloses an active cooler and thermal panels mounted to the spacecraft at a location spatially separated from the instrument.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3644

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3, 9, 10, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell in view of the admitted prior art on page 8 (paragraph 26).

Fischell discloses all claimed parts except for the active cooler being a cryocooler. However, the admitted prior art teaches cryocoolers having compressors and cold head assembly that includes cold finger are well known.

It would have been obvious to one skilled in the art at the time the invention was made to have used cryocoolers having compressors and cold head assembly that includes cold finger in Fischell's system as taught by the admitted prior art for a more efficiently temperature control system. Please note that mounting the cryocooler to the north thermal radiator panel is a step that one skilled in the art would have taken to accommodate the spacecraft for certain missions.

Re claims 9, 10, and 13, please note that the use of multiple active coolers for thermal capability, redundancy, and reliability are steps that one skilled in the art would have taken to improve the safe operation of the spacecraft.

Claims 4-8 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell as modified by the admitted prior art as applied to claims 1-3 above, and further in view of Feger.

Art Unit: 3644

Fischell as modified by the admitted prior art discloses all claimed parts except for the thermal link having braided copper. However, Feger discloses that thermal links made up of braided copper are well known in the art.

It would have been obvious to one skilled in the art at the time the invention was made to have used thermal links made out of braided copper in Fischell's system as modified by the admitted prior art and as taught by Feger to have a more efficiently temperature control system.

Re claim 8, please note that it is an obvious option for one skilled in the art to have a working fluid tube passing through an opening in an earth platform of the spacecraft for access to the instrument portion to be cooled so that the spacecraft can efficiently control the internal temperature.

Please note that the use of a bank of multiple active coolers is obvious to one skilled in the art so that the spacecraft can be efficiently controlled.

Please note that the admitted prior art teaches that cryocoolers are well known. One skilled in the art would have used multiple stage cryocoolers and multiple links from the cryocoolers to efficiently control the temperature of the spacecraft.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell in view of Gelon et al.

Fischell discloses all claimed parts except for the closed loop control system. However, Gelon et al teaches that a closed loop control system is well known.

It would have been obvious to one skilled in the art at the time the invention was made to have used a closed loop control system in Fischell's system as taught by Gelon et al to efficiently control the temperature of the spacecraft.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fischell in view of Caplin.

Fischell discloses all claimed parts except for the solar array. However, Caplin teaches that solar panels are well known.

It would have been obvious to one skilled in the art at the time the invention was made to have used solar panels in Fischell's system as taught by Caplin for generating power.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

York, Cullimore, Nakamura et al, Lester, and Eller et al teach temperature control means.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tien Dinh whose telephone number is 703-308-2798. The examiner can normally be reached on 9-6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on (703)305-7421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
